February 25th, 1858. Editors of the N. Y. Day Book:

E. H. PALMER, Attorney at Law, Clinton, Ill. A CHEAP ICE HOUSE. -It has been a prevalent notion that ice houses must be made in the earth—but a wiser

generation has discovered that the heat of the earth will consume ice more rapidly than the air. A writer in the Agriculturist, gives the following description of one on "I partitioned off the northeast corner of my woodhouse which opens to the west, and is 25 feet wide. The ice room is about 9 feet square; is clapboarded on the studs on the north and east, and lined on the inside,

leaving the 4 inch space between empty. On the south is an inch board partition, just tight enough to hold

sawdust. On the west, I slip in boards, like bars, to any height I wish to pile my ice, and leave the upper part open, just as is convenient. This is my house. Into it, on the ground, I put from 6 to 10 inches of sawdust, then put in my ice, one foot from the partition on every side, packing it as closely as I can, and in as large blocks as I can conveniently handle. I then fill

I have practised in this way for two years past, and had all I wanted for dairy and other uses, and to give to my neighbors, and I had plenty of good ice left last
